## EDUCATION

---

### Lagos State Polytechnic

Higher National Diploma in Computer Science,

Lagos, NGA

May. 2022 – Aug 2024

## EXPERIENCE

---

### Full Stack Developer

Aug 2022 – Jan 2024

Remotual

Illinois, Chicago

- **Built** 5+ feature-rich web applications for clients, **scaling** to handle over 500 concurrent users. Leveraged full-stack expertise with modern frameworks for seamless integrations, **streamlining development** for future projects..
- Collaborated effectively with project managers and clients to deliver polished software, maintaining a 90% on-time and on-budget project completion rate. Achieved a consistent client satisfaction rating of 4.8 out of 5.
- Drove collaborative design discussions to maintain project cohesion; created and integrated two internal frameworks that boosted team productivity by 15% and improved code re-usability by 20% throughout various initiatives.

### Web Developer

October 2022 – October 2023

BoltCliq

Lagos, NGA

- Crafted responsive, visually-appealing UIs with Vue.js & Nuxt.js, achieving **sub-1 second load times** for a seamless user experience across all devices.
- Spearheaded development of internal UI component libraries, boosting code reusability by 25% and **reducing development time by 15%** for future projects.
- Engineered and optimized scalable state management and routing for SPAs, efficiently handling **up to 10,000 data updates per second**, enhancing user experience and ensuring seamless, uninterrupted navigation across the application.

### Software Developer (Web)

March 2021 – October 2021

Luvanex Group

Lagos, NGA

- Overhauled obsolete PHP legacy source code of two production applications, resulting in increased usability
- Spearheaded and maintained a portfolio of 8 responsive websites, enhancing user experience and adherence to best practices, which led to a 25% increase in website traffic and user retention.
- Executed comprehensive testing and debugging, reducing functional and usability issues by 15% across the websites
- Managed web hosting and servers, optimizing performance to maintain a 98% up-time rate for all managed websites
- Amplified SEO efforts, driving a 30% increase in organic traffic and significantly improving search engine rankings.
- Regularly performed website maintenance, including content updates and troubleshooting bugs.

## PROJECTS

---

### Wallet Service API | NodeJs, Express.js, SQLite, LuciaAuth, Docker

2024

- Developed mid-tier wallet service API using Node.js and Express.js for real-time balance updates and handled 1,000 transactions/second.
- Designed scalable API architecture for future growth and potential integration with mobile wallets.
- Implemented secure user data and transaction protocols, ensuring user trust and compliance.

### RealMode Shop | Node.JS, API, Express.js, MongoDB, Vue.js

2024

- Built a mid-sized e-commerce platform with QR code verification (reduced counterfeit claims by 15 percent)
- Implemented a user-friendly product search and filtering system leading to a 10 percent boost in average order value.
- Streamlined checkout with a 20 percent faster purchase flow and increased mobile conversion rate by 12 percent. This user-friendly experience caters to today's mobile-first shoppers.
